To Whom It May Concern:

I entered my phone numbers on the telephone privacy list because more than 95% of all incoming calls I was receiving were solicitation calls; ½ of them being the “recorded” solicitation machines calling me. I still get those calls because they are randomly selected by the machine. I changed my phone number and got it non-published and still get those machine calls.

I am sick of this. My phone is still ringing constantly without the FTC possibly making it even easier for companies to invade my home and privacy with their continued calls.

They don't care we are on the NO-CALL list. They still call. Caller ID says unknown, or, “EVEN INCORRECT PHONE NUMBERS”, and when you get mad at them for calling and tell them you are going to report them to the authorities they merely laugh and say....”try and find us”.

They circumvent the law already without the FTC lowering the guidelines.

Please continue the NO-CALL list; please make it even more strong and enforceable.

Sincerely,  
Karen L. McDonald
